PPAD-C-HB-DALI-ADDR

Ceiling mounted, high bay DALI addressable presence detector

Key Features

- PIR Sensor: Detects movement within the unit’s detection range, allowing load control in response to changes in occupancy
- Light Level Sensor: Measures the overall light level in the detection area
- Status LEDs
- Connection to DALI network for power and communication
- Adjustable mask (supplied) for limiting beam direction

Overview

The PPAD-C-HB-DALI-ADDR is a ceiling mounted, fully addressable DALI passive infrared PIR presence/absence detector designed to be part of the iLight Series DALI network*. PPAD-C-HB-DALI-ADDR is a high sensitivity PIR detector suitable for high bay applications, such as warehouses and factories, and where high detection sensitivity is needed. Functioning as a presence detector, the unit returns occupancy data to the DALI network.

The photocell provides a lux level measurement value to the DALI network.
Technical Specifications

Weight: 0.10kg
Supply Voltage: 9.5VDC—22.5VDC via DALI
Supply Current: 8mA
Terminal Capacity: 2.5mm² (solid or stranded)
Material (casing): Flame retardant ABS and PC/ABS
IP rating: 40 without gasket, 65 with gasket (Supplied)
Compliance: EMC-89/336/EEC, LVD-2006/95/EC

Accessories

SB-C: Surface Mounting Box
SB-C-EX: Surface Mounting Box Extender

Detection

Ideal for warehouses, atriums and high bay applications where daylight harvesting and minimum light levels are required.
Maximum recommended mounting height: 15m

Commissioning

*This sensor is intended for use with iLight DALI controllers (Using SCMD4). Commissioning is done when addressing devices on the DALI loop.

Dimensions

Maximum recommended mounting height: 15m
